RTLS for HTM Teams - Heidi Horn

RTLS Platforms Have Become a "Must Have" Solution for BioMed Orgs

RTLS technology significantly enhances the efficiency and performance of various hospital operations, and contemporary HTM departments now consider it an essential tool. By enabling HTM technicians to avoid time-consuming tasks like searching for equipment, RTLS allows them to concentrate on the specialized work they are trained for. Additionally, it provides the HTM department with crucial data to optimize the management of clinical equipment.

Heidi is an accomplished and strategically focused healthcare technology executive, board member, and consultant with a consistent record of helping the teams she works with achieve their corporate growth and performance objectives.

AiRISTA Products Available From Premier Inc.

AiRISTA Awarded Asset Tracking & Management Solutions agreement with Premier, Inc.

Effective November 11, 2024, the new agreement allows Premier members to take advantage of special pricing and terms pre-negotiated by Premier for AiRISTA's suite of RTLS hardware and software solutions.

The agreement provides discounted prices for hardware and software products provided by AiRISTA. AiRISTA's comprehensive portfolio of asset and people tags includes support for Wi-Fi and Bluetooth® Low Energy (BLE). Wireless infrastructure devices augment the customers' existing access point network to provide room level and even submeter accuracy. Because the software platform is the most important part of an RTLS investment, AiRISTA has rearchitected its *sofia* software platform as an IOT-ready engine with a variety of tools for application and workflow integration.

Premier is a leading healthcare improvement company, uniting an alliance of approximately 4,350 U.S. hospitals and 325,000 other providers to transform healthcare. With integrated data and analytics, collaboratives, supply chain solutions, consulting and other services, Premier enables better care and outcomes at a lower cost.

Cyber Security & RTLS Synergy

RTLS bolsters healthcare security by providing essential data for threat detection and response.

Cybersecurity and asset management have become inextricably linked in the complex landscape of modern healthcare. As biomedical engineering teams grapple with the challenges of tracking assets, they are increasingly tasked with contributing to the prevention of escalating cyber threats. The result is a much needed unified approach to asset management and security implementation. This webinar explores how the integration of AiRISTA Flow and Cynerio empowers healthcare organizations to effectively manage medical devices, mitigate risks, and ensure patient safety.
